INTELLIGENT FURNITURE

PURE

Simplicity that adapts to any space and environment

PURE embodies the essence of functional design: a chair entirely moulded in high-quality polypropylene, combining strength, comfort and lightness. Its monobloc design gives it a contemporary and versatile aesthetic, making it ideal for a wide range of settings from university and corporate spaces to informal areas, coffee shops or auditoriums.

Designed according to advanced ergonomic principles, **PURE** naturally adapts to the user's posture, providing more efficient lumbar support and lasting comfort, even in intensive use environments. Available in a variety of colours, it allows the creation of harmonious, dynamic and personalised spaces, reflecting the identity of each environment.

Naturally durable, the **PURE** chair is recyclable and manufactured using processes that minimise environmental impact. These include the use of energy generated by our solar panels and a closed-loop water cooling system for the moulds, which prevents water waste. At least 30% recycled polypropylene is used in the production of the chair. Nautilus is certified to *ISO 14006*, integrating eco-design from the very first stages of product development.

***PURE** means essential: nothing excessive, everything in its right place. A chair designed to last, evolve and inspire.*

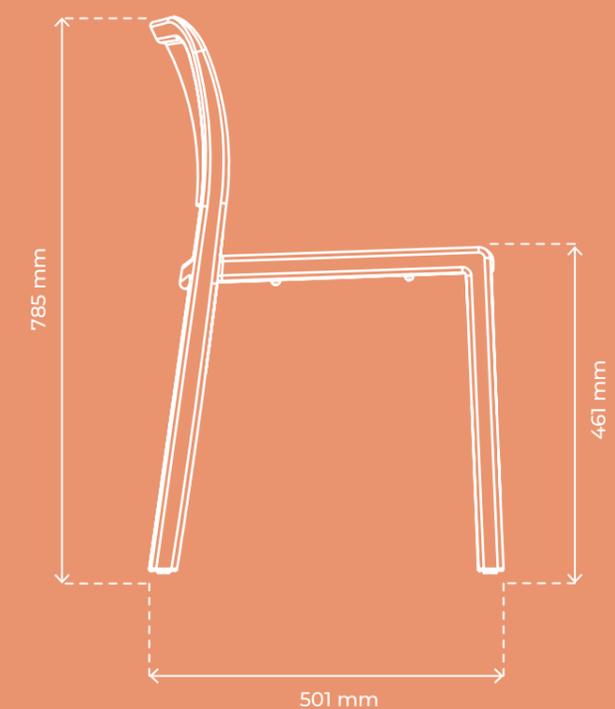

FEATURES:

- Upholstered seat (optional)
- Floor protection and stacking glides
- Stackable up to 8 chairs, or up to 30 with a stacking trolley
- Available only in size 06

AVAILABLE COLORS:

SIZE 06

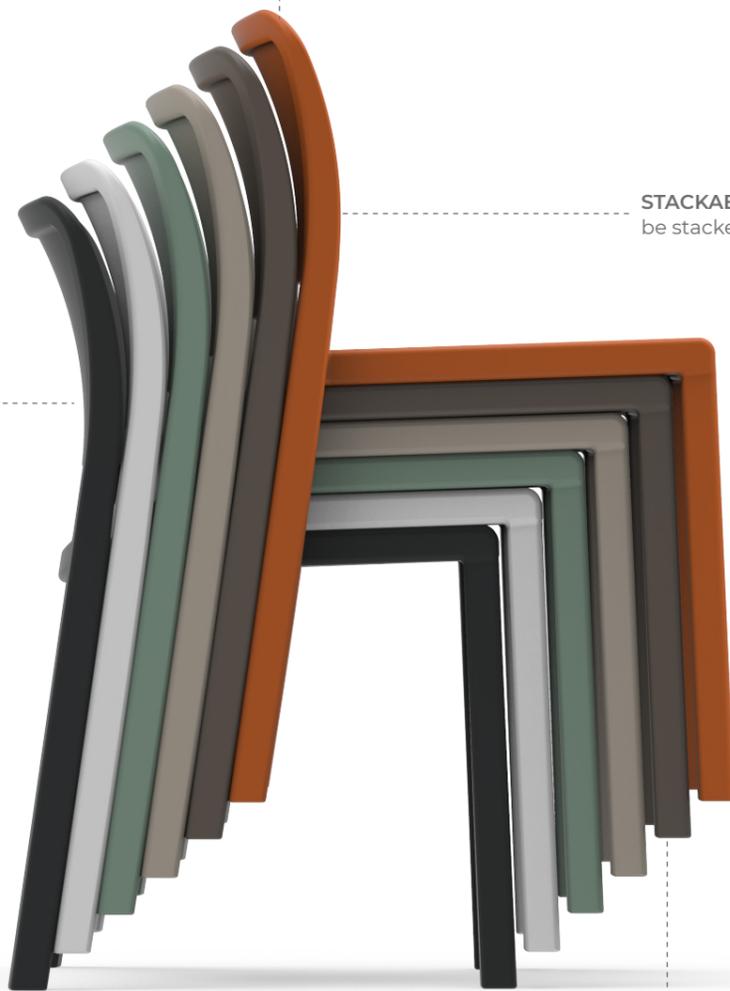

TECHNICAL SPECIFICATIONS

ERGONOMICS: backrest and seat with optimised contours for lumbar support and postural comfort.

STRUCTURE: monobloc in injected polypropylene, with no joints or metal components.

SUSTAINABILITY: recyclable material, produced with low energy consumption during the moulding process.

STACKABLE: allows multiple chairs to be stacked.

COLOURS: a colour range adaptable to different architectural contexts.

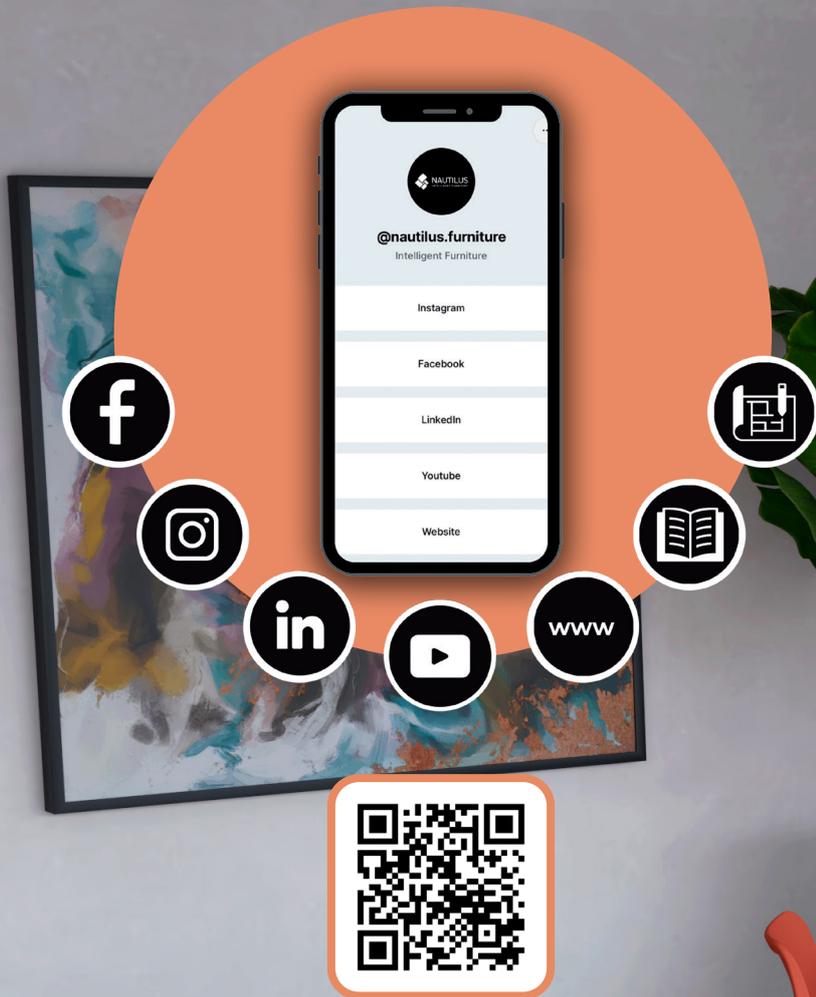

FINISHES: matte surface, scratch-resistant and easy to clean.

USAGE: monobloc in injected polypropylene, with no joints or metal components.

WEIGHT: lightweight, easy to transport and store.
